- ❑ APEL: Architecture. LcgRecords Table. Monthly summarization.
- ❑ New Parallel & Interactive job's accounting portal.
- ❑ How data is collected. Job's life cycle.
- ❑ Resource broker's database.
- ❑ Gathering & data transformation.
- ❑ Discussion & future work.

APEL: Architecture

Information is gathered from each site job's accounting into a central repository R-GMA (Relational Grid Monitoring Architecture).

APEL: LcgRecords Table

The information is stored using the **schema proposed by the Global Grid Forum's Usage Record Working Group.**

Column Name	Datatype	NOT NULL	AUTO INC	Flags	Default Value

RB's data gathering process

- ❑ **Resource Broker** data query & transformation:
 - ▶ Waiting time.
- ❑ Job requirements **information extraction**:
 - ▶ JobType.
 - ▶ Interactive Agent.
 - ▶ Parallel Type.
 - ▶ NodeNumber.
 - ▶ Virtual Organization.
 - ▶ Executing Site.
- ❑ Insertion in **local database** "JobRequirements" table.
- ❑ **Monthly Summarization** in "SumNJobsRB " table.

“JobRequirements” table schema

- ❑ Data gathered from **all Resource Brokers**.
- ❑ **Job requirements are parsed** and transformed into a suitable database field format.
- ❑ Data is stored in **local mySQL database**.

Column Name	Datatype	NOT NULL	AUTO INC	Flags	Default Value

$$\overline{WT} = \frac{\sum_{\forall Sites, VO} WT(VO, Site) \cdot Njobs(VO, Site)}{\sum_{\forall Site, VO} Njobs(VO, Site)}$$

Waiting Time. Weighted average II

- ❑ Fix **missing data**: from R-GMA servers 211,468 jobs against 191,812 from RBs (10%).
- ❑ Fix "**Site Not Available**".
- ❑ **Interrelate RB's & R-GMA** information (e.g. show job efficiency for P&I jobs).
- ❑ Parallel jobs: **number of processors**, not only number of nodes.
- ❑ Accounting for **submitting sites**.

Questions open for discussion:

- ❑ Which **other information** must be shown ?
- ❑ **Interoperability**: should the portal show EGEE's VOs and related jobs ?
