POLITECNICA
DE VALÈNCIA

Previous History

The Spanish Network for e-Science

Spanish Network for
e-Science

- The White Book of e-Science (<http://www.fecyt.es/e-ciencia/libroblanco.htm>)
- E-Science activities in Spain: Astronomy and Space, Biomedicine, Material Engineering, Earth Science, Physics, Computational Chemistry, etc.
- The National Research Network (RedIRIS) and the Connection to the European Network GEANT as the Basic Communication Infrastructure.
- Participation of the Spanish Research Centres in Projects and Initiatives as EGEE, DEISA, EELA, LHC, the Spanish Supercomputing Network, etc.
- Need of a Global Coordination of all the Activities, Development of Common Tools and Easy Access to the Research Resources: To Promote the Creation of a National Program of e-Science.

The Spanish Network for e-Science

Background

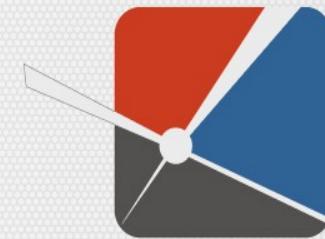

Spanish Network for
e-Science

- The Spanish Network for e-Science (CAC-2007-52) is a Network Initiative Funded by the General Directorate of Technological Policy of the Spanish Ministry of Science and Education under the R+D+i Plan 2004-2007.
- It was Officially Approved on December 2007.
- The UPV is the coordinating institution.

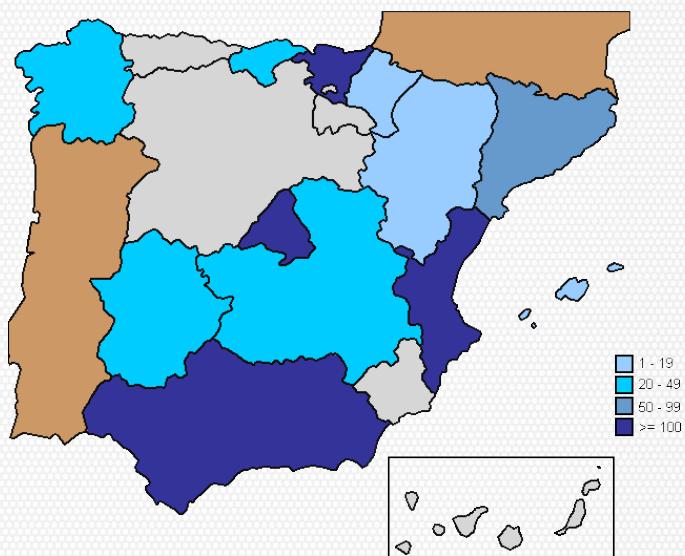

The Spanish Network for e-Science

Members

Spanish Network for
e-Science

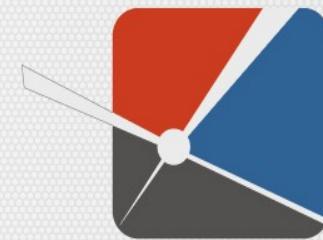

- Around 700 Researchers.
- 68 Research Groups.
- More than 40 Institutions.

- Grupo de Arquitectura de Computadores y Diseño Lógico / Univ. de Extremadura
- Grupo de Arquitectura de Computadores, Comunicaciones y Sistemas, Univ. Carlos III de Madrid
- Architecture and Technology of Computing Systems Group / Univ. Complutense de Madrid
- Grupo de Clusters y Grid Computing / Instituto de Biocomputación y Física de Sistemas Complejos / Univ. de Zaragoza
- Barcelona Supercomputing Center
- Consorci Centre de Supercomputació de Catalunya
- Grupo de Computación de Altas Prestaciones y Grid / CESGA
- Centro de Supercomputación y Visualización de Madrid / Univ. Politécnica de Madrid
- Computer Graphics Group / Centro de Estudios e Investigaciones Técnicas de Gipuzkoa
- Centro Informático Científico de Andalucía / Junta de Andalucía
- Centro de Investigaciones Energéticas, Medioambientales y Tecnológicas
- Grupo Centro de Motores Térmicos / Centro de Motores Térmicos / Univ. Politécnica de Valencia
- Unidad de Biocomputación / Centro Nacional de Biotecnología/CSIC
- Grupo de Gestión de Contenidos y Grid Semántica / Univ. de Deusto
- Donostia International Physics Centre / Univ. del País Vasco
- Distributed, Parallel and Collaborative Systems Group / Univ. Oberta de Catalunya
- Creación de una infraestructura de e-Ciencia Andaluza / CSIC
- European Theoretical Spectroscopy Facility / Univ. del País Vasco UPV / EHU
- Fundación i2cat

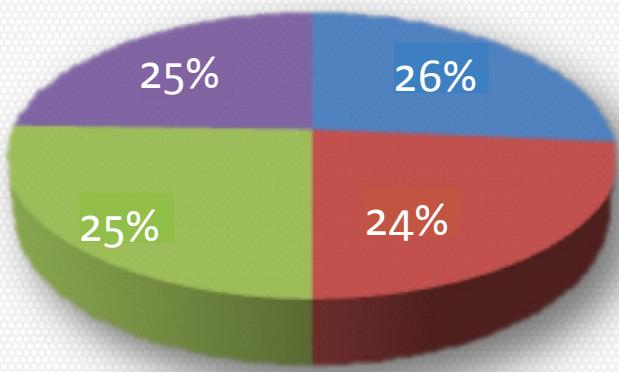

The Spanish Network for e-Science

Profiles of the Members

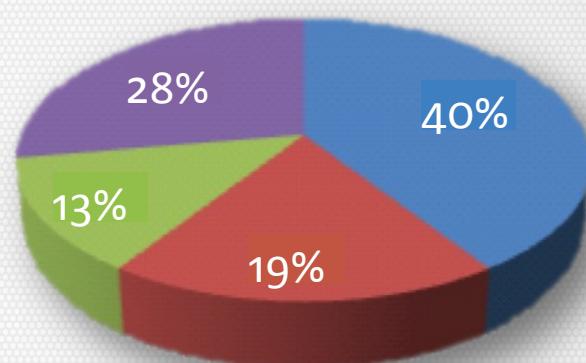

Spanish Network for
e-Science

- Evenly Distributed in Application Development, Middleware, Infrastructure Development, and Users.
- With an Important Interest on Applications.

■ Applications ■ Middleware
■ Infrastructure ■ Users

■ Applications ■ Middleware
■ Infr Supercomp. ■ Infr Grid.

The Spanish Network for e-Science

Objectives of the Network

- To Promote and Coordinate the Development of the e-Science in Spain.
- To coordinate the Spanish e-Infrastructures from the point of view of required investments, management, operation and user support.
- To Become the National Speaker for e-Science in the European framework.
- To foster the Cooperation with other Programs and Projects.
- To promote the Collaboration with Portugal (IberGrid) and other Countries in the e-Science Context.
- To transfer the Network results, and to train people.

The Spanish Network for e-Science

Main Areas

Applications

Biomed, HEP, Earth Sciences, Engineering, Physics,
Computational Chemistry, Astrophysics,

Grid Infrastructures

Support for gLite, GT4

Interoperable

Platform for Research, Seed for
Spanish Production Infrastructure

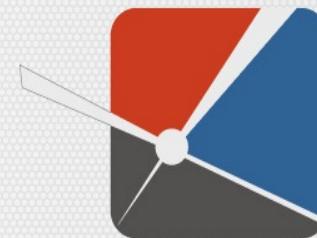

Interoperability
MPI Support
Interactivity
Load Balancing

Middleware

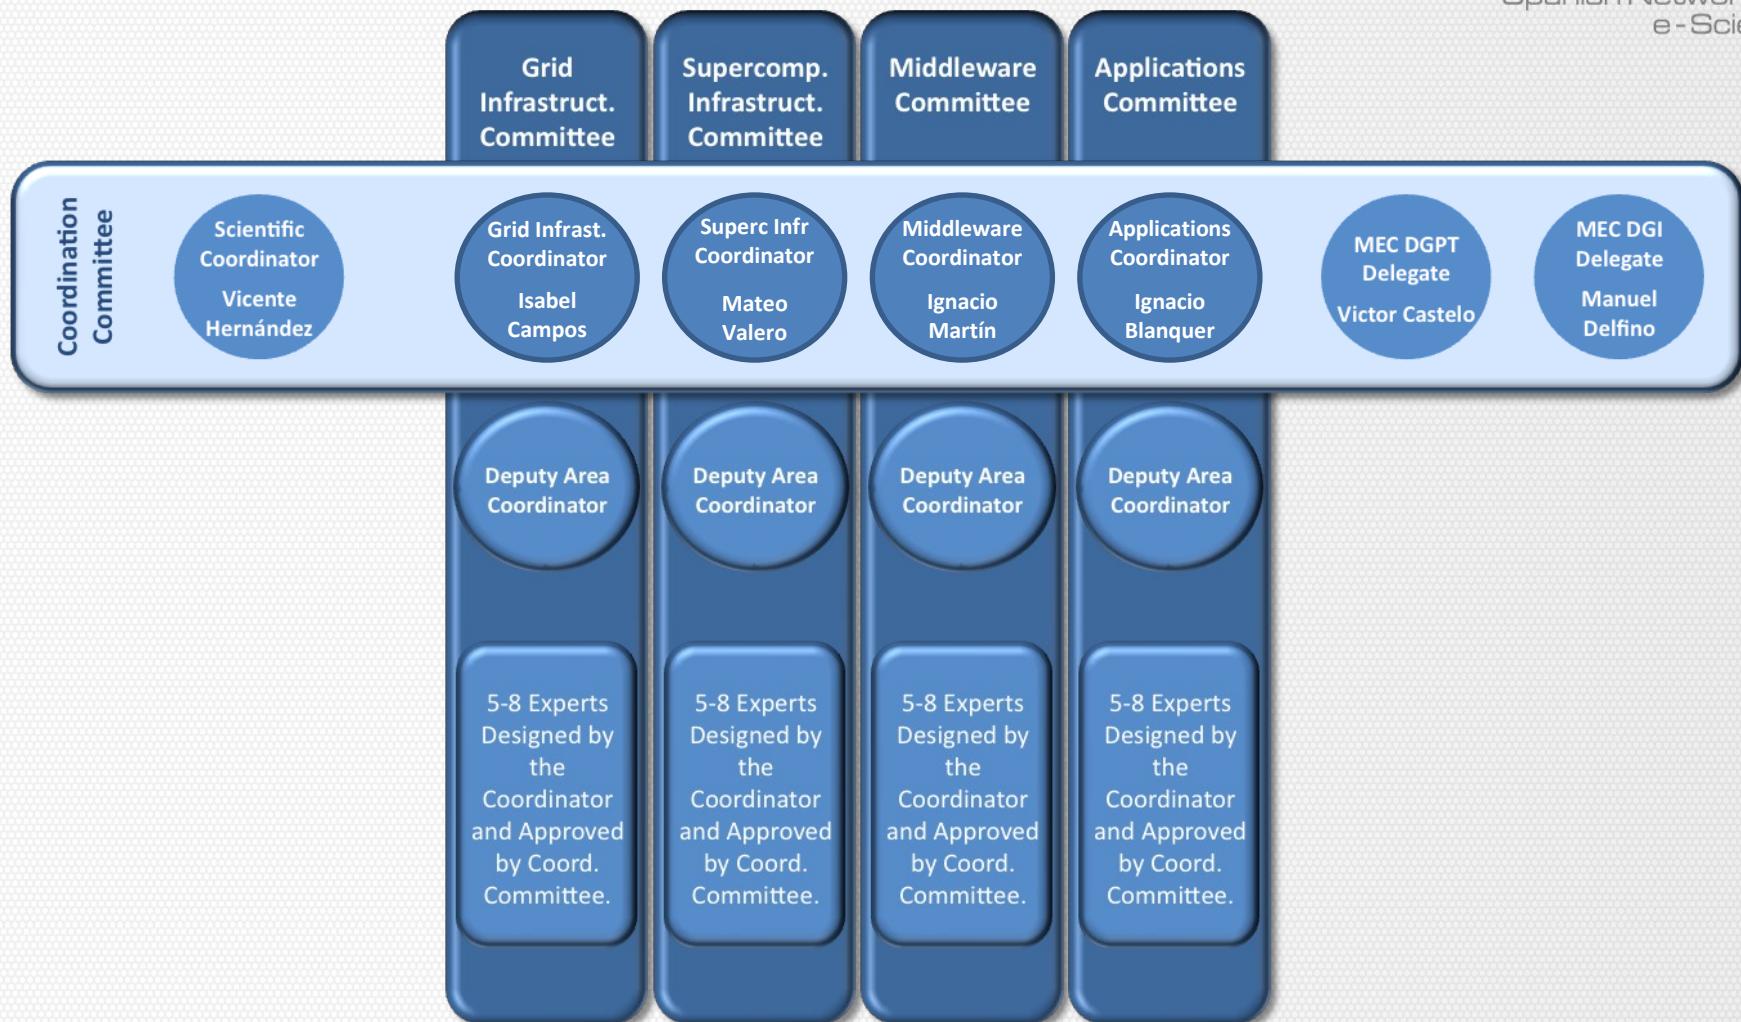

RES , Autonomic Centres
Supercomp. Infrastructures

The Spanish Network for e-Science

Organisational Structure

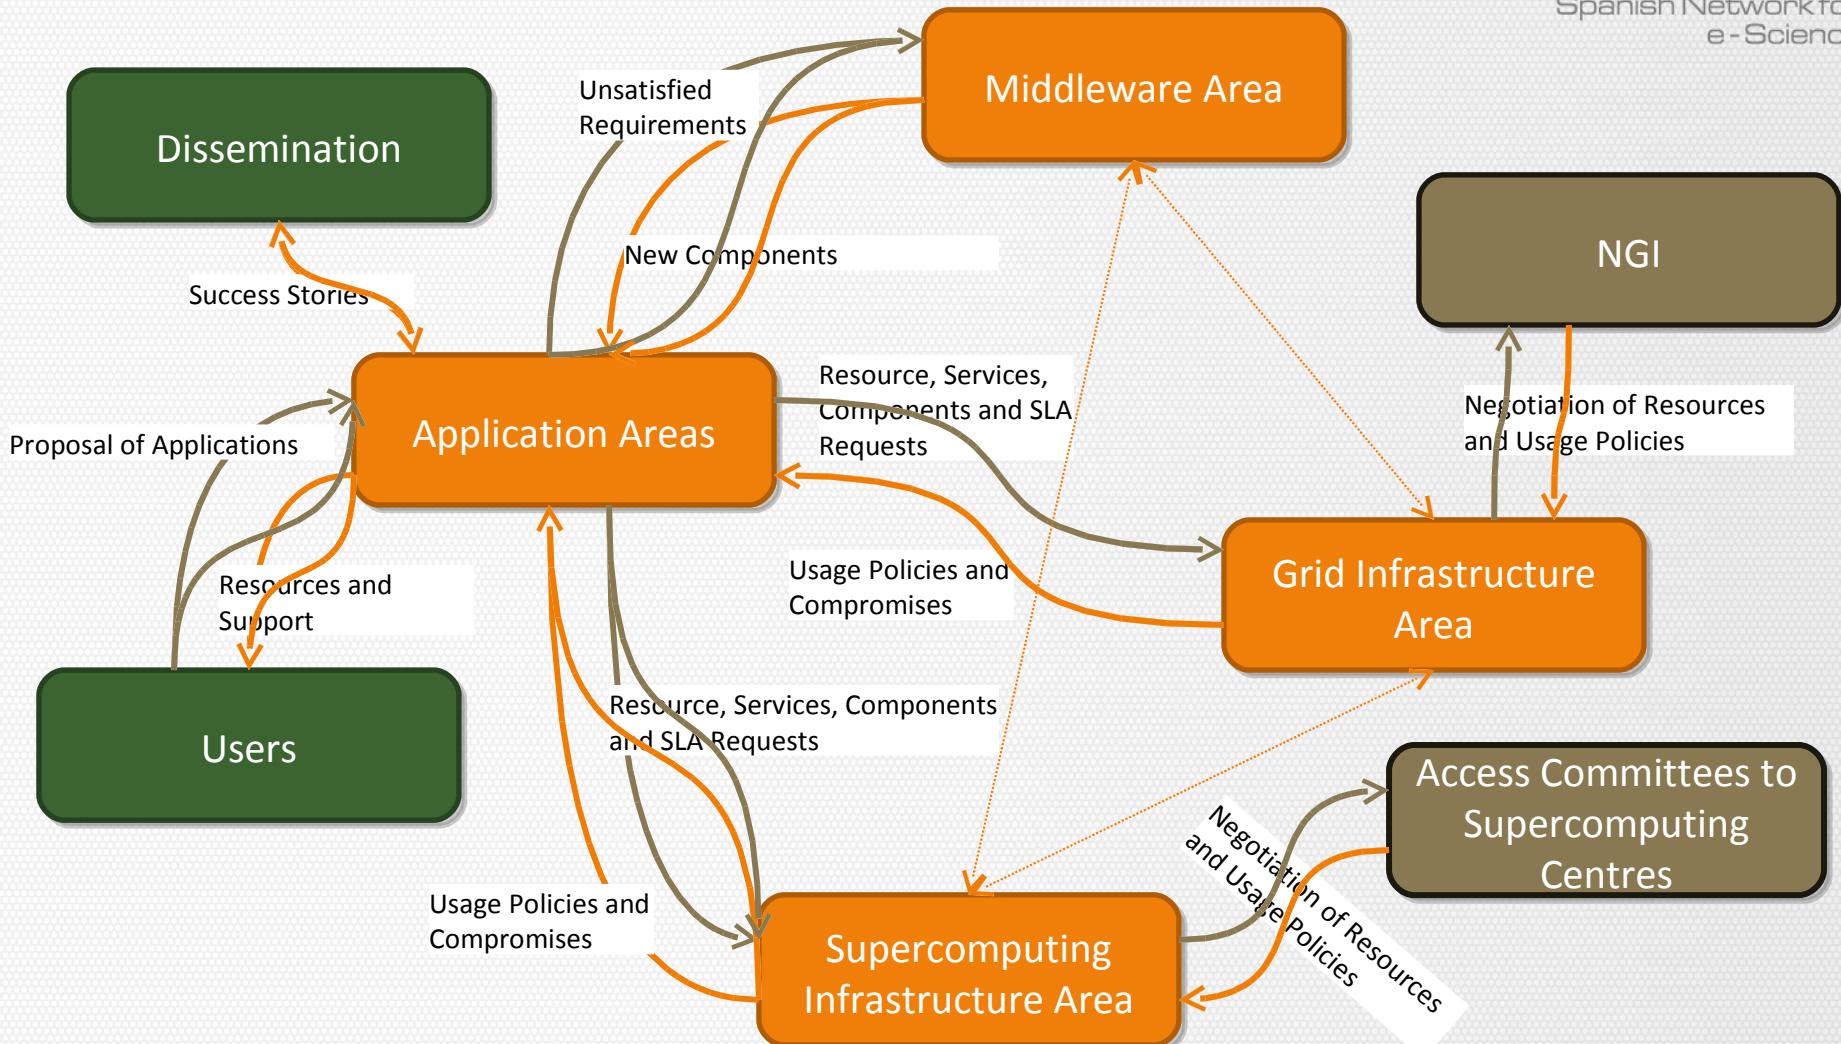

Spanish Network for
e-Science

The Spanish Network for e-Science

General Workflow

Spanish Network for
e-Science

Grid Infrastructure Area

Grid Infrastructure Area

Objectives

Spanish Network for
e-Science

- Main Mandate: To Set up a National Grid Initiative in Spain
 - An NGI is “an Entity **Recognised at National Level** and Established as a **Single Contact Point** that **Operates a General Purpose e-Science Infrastructure**, Supporting **Different User Communities**, and Able to **Mobilise Resources** and to **Contribute** and **Adhere to International Standards** and **Policies**” (*).
 - On the International Context of the European Grid Initiative

(*)Source: EGI (www.eu-egi.org), e-IRG (www.e-irg.org)

Setting up the Spanish NGI Infrastructure

Grid Infrastructure Area

Spanish Network for
e-Science

- This Infrastructure is Articulated by The Contribution of Resources by the Participant Groups.
 - The Infrastructure Must be Constructed on Top of Existing Resources. Interoperability of gLite and GT4 is a Key Issue.
- The Spanish Government Could Evaluate the Need to Fund such Infrastructure
 - If the Benefit for Researchers is Proven and Demonstrates an Economic Scale Factor.
 - If its Impact can be Quantitative Evaluated.
- Up to Now, 18 Centres are Willing to Participate.
 - Including the Support For Central Services, such as Certification.

Spanish Network for
e-Science

Supercomputing Infrastructure Area

Supercomputing Infrastructure Area

Objectives

- Collaboration Among the Spanish Network for Supercomputing and the Autonomic Supercomputing Centres
- Coordination Among Grid Infrastructures and Supercomputing Infrastructures.
- Participants
 - Spanish Network for Supercomputing (RES)
 - Autonomic Supercomputing Centres.
- Objectives
 - Progress for Sharing an Access Committee to the Infrastructures.
 - Coordinate with the Grid, Middleware and Application Areas in the Development of Joint Activities.

Spanish Network for
e-Science

Middleware Area

Middle ware Area

Objectives

Spanish Network for
e - Science

- To Identify and Analyse the Requirements of Infrastructures and Applications for Defining Middleware Strategic Projects.
- To Coordinate and Support the Execution of Middleware Projects.
- To Promote and Support new Components and their Deployment on the Infrastructure.
- To Represent The National Middleware Community in Specialised Forum.
- Objectives
 - Concentrate on High-Level Components, Closer to the Final User or to the Infrastructure Manager.
 - The Basic Middleware (GT, gLite and UNICORE) is Mature.
 - To Set-up a Platform to Support Research Groups in the Area of Middleware, in the Framework
 - Access to the Production Infrastructures Through External or Own Certification Processes.

Spanish Network for
e-Science

Applications Area

Applications Area

Objectives

- To Consolidate Current Virtual Organisations, Increasing the Groups Involved.
- To Promote New Areas, Virtual Organisations and Applications.
- To Normalise the Methodologies for Analysis, Migration, Deploy and Exploitation of e-Science Applications.
- To Promote the Creation of General-Purpose Software.

Applications Area

Application Areas

■ Biomedicine / Bioinformatics / Biotechnology.

■ Engineering.

■ Earth Sciences.

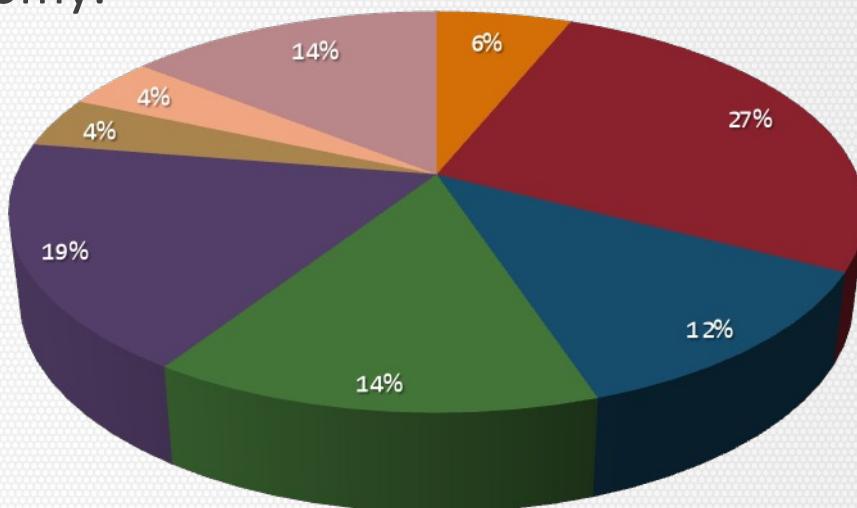

■ Computational Chemistry.

■ High Energy Physics / Computational Physics.

■ Astrophysics / Astronomy.

■ Mathematics.

■ Information and
Communication
Technologies.

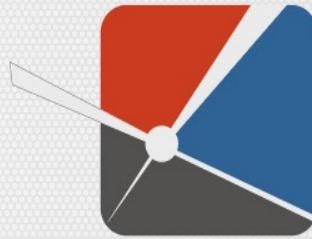

Applications Area Support

- E-Science Implies Not Only Computational Resources
 - It is Important to Consider Data, Scientific Resources and Collaborative Environments.
- The Network for e-Science will Foster and Assist the Complete Cycle of Grid Applications
 - By Means of Collaborations and Persistent Expert Teams.
 - By Means of External Projects.
- The Network will Provide the Channels for the Communication Across Infrastructure, Middleware and Application
 - Create Single Contact Points Access to Infrastructures.
 - Provide Analysis and Support for the Applications.

Latest Information

Spanish Network for
e-Science

The screenshots show the following content:

- Home Page:** Features a large banner for "Novedades en la Red" (News from the Network) about a Grid and Supercomputing event. It includes sections for "Áreas de Aplicación" (Application Areas), "GRID" (Grid), and "Supercomputación" (Supercomputing). The footer mentions "Entidad Coordinadora: UNIVERSITAT POLITÈCNICA DE VALÈNCIA".
- Participants and Collaborators:** A list of members including the University of Valencia, the Spanish National Research Council (CSIC), the National Institute of Aerospace Technology (INTA), the National Institute of Mathematics and Cryptology (INM), the National Institute of Nuclear Physics (CERN), and the National Institute of Space Research (INPE).
- Events:** A section listing various events such as "Grid and Supercomputing at Services of the Spanish Scientific Community" and "Course of Grid in Valencia from July 15 to 18 organized by the RENCI".

- <http://www.e-ciencia.es>
- General information on the Network.
- Specific information on the Application, Middleware, Grid Infrastructure and Supercomputing.
- Details on Events Organised by the Network and other Related Events.
