ICTS seminar: Analyzing the application robustness against transient faults
- Actualizado (14.12.2010)

João Gramacho. Computer Architecture an Operating System Department, Universidad Autónoma de Barcelona.
Friday 17th December 2010, 12:30 am . CESGA's conference room
 What are transient faults, their possible effects on applications and to evaluate the robustness of the applications (and their

protection mechanisms) against transient faults.
