
TAPE LIBRARY

- Actualizado (28.05.2008)

The Finis Terrae system includes a robotized tape library intended for secondary storage of huge amounts of information. The configuration available at CESGA includes two identical HP ESL712e tape libraries, interconnected as a single unit.

The main characteristics are:

- 12 LTO4 magnetic drives
- 800 GB/1600 GB per tape (native/compressed)
- 1424 cartridge slots
- 2,2 Petabytes of total storage
