
ICTS seminar: Analyzing the application robustness against transient faults

- Actualizado (14.12.2010)

João Gramacho. Computer Architecture an Operating System Department, Universidad Autónoma de Barcelona.

Friday 17th December 2010, 12:30 am . CESGA's conference room

What are transient faults, their possible effects on applications and to evaluate the robustness of the applications (and their protection mechanisms) against transient faults.
