
NEW SGE VERSION AVAILABLE ON FINIS TERRAE

- Last Updated (26.05.2011)

A new version of the SGE batch system is available. To use it is just load the corresponding module:

```
module load sge/6.2u5p2
```

Once the module is loaded qsub, qstat, etc will be using new SGE version.

IMPORTANT: If you want to submit an MPI job you have to load the SGE module in the job script before executing mpirun:

```
#begin job_script.sh  
...  
module load sge/6.2u5p2  
mpirun ...  
...  
#end job_script.sh
```

If you have any further questions or concerns, please, contact with the Systems Department
