
Galicia's Science and Technology Network

- Last Updated (14.12.2009)

RECETGA (Rede de Ciencia e Tecnoloxía de Galicia) provides communications services of the highest quality standards to the scientific and R&D communities in Galicia. RECETGA provides its service through more than 30 nodes spread all over Galicia.

RECETGA is cooperatively managed by CESGA and the telecommunications regional authority of Galicia, the "Consellería de Cultura, Comunicación Social e Turismo". This network is based on ATM technology. RECETGA permits access to the services provided by CESGA, interconnects research centers and allows access to the Internet.
