
FLOSS

- Last Updated (18.06.2010)

The main aims of CESGA's FLOSS department are the following ones:

- Evaluate the current situation of FLOSS in Galicia, analyze the existing technological options and carry out technological watch for its possible coming into operation in our society.
- Work together with the different initiatives related to FLOSS that are being carried out in Galicia.
- Experiment and detect significant cases of FLOSS implementation in Galicia, with the aim of identifying its strong and weak points and providing, at the same time, demonstration activities.

Our activities are based on:

- Coordination of the project mancomun.org – Galician Initiative for FLOSS
- Surveillance through the FLOSS Observatory.
- Awareness-raising through dissemination actions
- undertaking of actions favoring the localization of FLOSS in Galician.
