
EGEE posts open at CERN

- Actualizado ()

CERN has started to open posts for the different EGEE activities for which it will receive EU additional funding.

These posts will cover NA1, NA2, NA4, NA5, SA1 and JAR1. All the posts will be available to all CERN member states national and have a duration of 2 years (renewable for another 2 years in case of extension of the project). This will be another very effective way for many of our partners to contribute their skills to those areas where the center of activity will be at CERN and foster a good transfer of knowledge and experience within the consortium.

Please access the CERN standard WEB page and follow the links to job vacancies (e.g.
